EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS   La Paz, Bolivia
Manager of Full Stack Web Developer   March, 2018 – Present

The Simpsons Fan Club — This site consumed APIs to show information about the episodes of The Simpsons series.
- Built with: JavaScript, HTML5, CSS3, Webpack, and Jest.

Leaderborad —This project demonstrated through APIs the creation of a registry of best scores for games.
- Built with: JavaScript, HTML5, CSS3, Webpack, and Jest.

To Do List —The To-Do List was a minimalist project that used JavaScript and Webpack to manage a simple yet effective task list.
- Built with: JavaScript, HTML5, CSS3, Webpack, and Jest.

Awesome Books — Awesome Books was an innovative project that utilized JavaScript modules and a Single Page Application (SPA) to manage a list of books.
- Built with: JavaScript, HTML5, and CSS3.

Event Page — I designed a captivating landing page specifically to promote a Catholic concert.
- Built with: JavaScript, HTML5, and CSS3.

MODERNIZED THE PROCESS OF ISSUING MILITARY AND PRE-MILITARY SERVICE CERTIFICATES IN THE PLURINATIONAL STATE OF BOLIVIA. — Reduced processing time from one month to a few hours.
- Implemented robust security measures comparable to those used for paper bills or currency.
- Technologies used: Microsoft SQL Server, Microsoft ASPX with Visual C#.
- I was recognized for leading this project, even receiving a promotion.
